- 1.Primary Cardinality:
A single secondary object can be attached to how many primary objects.
- 2.Secondary Cardinality:
How many secondary objects can be attached to the mentioned primary object.

Eg:

Primary	Secondary	Relation	Condition	Primary Cardinality	Secondary Cardinality	Attachability	Changeability	Detachability
AztestARevision	PDF	Match All	is True	2	3	Unrestricted	Changeable	Unrestricted

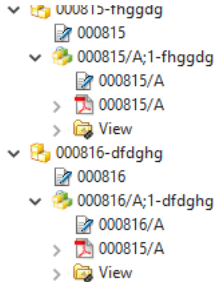

Here PC = 2 and SC = 3

Considering the secondary cardinality:

Here we can able to attach only 3 PDFs.

Considering the Primary cardinality:

Here we can attach a single PDF for 2 revisions only.
