Watermark:

MDS Template: Browse...

In the MDS Template, add the document management template that you have created in TC.
 Deploy the changes.

3. Open Tc and create a new workflow template, use the action handler **DOCMGTAPP-apply-pdf-control**.
4. Open TC and create object instance that you gave in the System Stamp Configuration create page.
 Attach a PDF Dataset and add a PDF type Named Reference.
5. Initiate the workflow on the BO Revision and check the PDF named reference that was attached.
