

Options and Variants/Override Folder/ps_upload

Wednesday, July 31, 2024 5:30 PM

In Options and variants,

1st create options by selecting the root parent and create constraints and error checks if you want to and then add variant conditions to all options and apply variant rule.

- "Present a child option from this Module" - To populate this tab, we have to create options on child of the root parent, so that we can define child module constraints.
- "Create a new error check" - used when we want to show user some info or warning or error.
- "Internal modular constraints" - used when the user selects 2 options and the 3rd option should be automatically selected then we will use this.
- "Define child module constraints" - used when the user selects 2 options from sub child and the 3rd option should be automatically selected.

BOM Line	Variant Conditions	Item Rev Status	Quantity
000318/A/1-U1 (View)			
000319/A/1-U2 (View)			
000320/A/1-U3 (View)	000318:U2 = "U3"		
000328/A/1-U33	'000319-U2:U22 = "U33"		
000329/A/1-U34	'000319-U2:U22 = "U34"		
000321/A/1-U4	000318:U2 = "U4"		
000322/A/1-U5 (View)			
000323/A/1-U6 (View)	000318:U5 = "U6"		
000330/A/1-U61	'000322-U5:U55 = "U61"		
000331/A/1-U62	'000322-U5:U55 = "U62"		
000324/A/1-U7	000318:U5 = "U7"		
000325/A/1-U8 (View)			
000326/A/1-U9 (View)	000318:U8 = "U9"		
000332/A/1-U91	'000325-U8:U88 = "U91"		
000333/A/1-U92	'000325-U8:U88 = "U92"		
000327/A/1-U10	000318:U8 = "U10"		

Closure Rules – they will restrict the visibility for a particular group/role.

Insert level – When we use this option by selecting a BOM line, we will get an option to create a new object, and the created object will be added as a parent to the selected

Packing or unpacking structure lines:

Grouping multiple identical components in one level of an assembly is known as packing. You can pack components if they satisfy all of the following requirements:

- They have the same item revision.
- They have the same find number.
- None have variant conditions or they all have the same variant condition.

Override Folder

1. Create a structure and create a revision rule by selecting override from the dropdown.
2. Open My Teamcenter and select the required revision from the structure that we have created an override revision rule and paste it in the mentioned (override) folder.
3. Revise the revision that you have pasted in the override folder.
4. Open Structure manager again, you will see the latest revision. Now apply the override revision rule that you have created.
5. Now, the revision that you have added in the override folder will replace the original once in the structure.

Ps_upload

Used to create structure from utility

Command: D:\TC13\TC_ROOT\bin>ps_upload.exe -u=izn -p=izn -g=dba -i="C:\Users\13337\OneDrive - IZ\Documents\uday.txt"

File Name Format: Item Name				
#DELIMITER	,			
#COL	Level	item	Name	Seq
	0,	000603,	p,	10
	1,	000604,	c1,	10
	2,	000605,	c12,	20
	2,	000606,	c13,	20
	3,	000607,	c24,	30
