

Basics and Handlers

Thursday, October 31, 2024 11:55 AM

Types of Quorum:

1. Rule Quorum – If we place multiple rule handlers on a task, this quorum will tell how many rules must be satisfied to go in to next task.
2. Sign off Quorum – This will tell how many reviewers are required to approve the particular task.

Epm-set-task-result-to-property --> itemrevision_id & owning_user

Epm-check-related-objects --> Secondary - PDF with Iman_relation...also status (pdf)

Epm-validate-target-objects --> Primary - (ItemRevision) .. latest revision

Epm-check-object-property -->

Epm-check-target-object --> Status

Tcrs-check-status --> can check the Status of previous and current revisions.

Epm-require-authentication --> Password

PROJ-assign-members --> Assign members to project

Epm-create-sub-process --> create sub process

Epm-set-property --> Change value of a property (bypass used to change even when objects is having status)

Epm-check-signoff-comments --> Comments mandatory

Epm-auto-assign --> Resource Pool

Epm-remove-objects --> Remove object from target

Epm-suspend-on-reject --> Suspend WF if Decision is Reject

Epm-asserts-target-checked-in --> Target objects checked-in (on validate task)

Epm-create-form & Epm-display-form --> create and display form

Epm-disallow-adding-targets & Epm-disallow-removing-targets --> Disallow adding/removing targets

TCRS-purge-dataset --> Purge dataset

Epm-debug --> Prints info

Ps-attach-assembly-components --> Add structure objects as targets

Epm-attach-related-objects (-property ps_children/ps_parents) --> Add structure objects as targets

Epm-check-action-performer-role --> only dba should perform this task (Do task)

Epm-move-attached-objects --> Targets to Reference / Reference to Target

Epm-demote & Epm-demote-on-reject --> Go back to previous task if review task is rejected

Epm-create-relation

Epm-create-status & epm-set-status

Epm-notify -> send notifications to users through TC mail and OS...**Mail_internal_mail_activated** - True

EPM-adhoc-signoffs [-auto_complete] -> Ad-hoc check

Epm-late-notification
