

Workflow surrogate/ Resource Pool

Thursday, October 31, 2024 12:00 PM

Workflow surrogate

When we use this workflow surrogate for a particular user, all the tasks that will be assigned to this user will be transferred to user that we have mentioned. This is used when a particular user is on leave/off.

My teamcenter --> Tools --> Workflow Surrogate.

Resource Pool

To use resource pool feature user needs to take the resource pool subscription and add the required group and role. If you want to assign a particular task use the handler, **EPM-auto-assign**.

Argument	Values
-assignee	resourcepool:manufacturing::engineer

Manufacturing --> Group
Engineer --> Role.
